# ZAMKHAM Ali

Cyber Security Student | SOC & Red team enthusiast | Python  
developer  
Lahore, Punjab, Pakistan

## Summary

Getting into cyber security learning how stuff works and how to keep it safe. Still early in the journey but enjoying every bit of it

---

## Experience

Zypher labs  
Python Developer  
December 2025 - Present (2 months)

Datacom  
Cyber Security Operations – Datacom Simulation  
December 2025 - December 2025 (1 month)

- Completed a hands-on cyber security simulation focused on monitoring and protecting internal systems.
- Investigated a simulated ransomware incident including phishing, credential theft, and file encryption.
- Analyzed security incidents, identified indicators of compromise (IOCs), and suggested containment steps.
- Practiced incident response procedures, risk assessment, and mitigation strategies.
- Improved practical skills in log analysis, threat detection, and cyber security operations.

Deloitte  
Deloitte Cyber job Simulation - Cyber security project  
December 2025 - December 2025 (1 month)  
Australia

Analyzed web activity logs to identify suspicious user activity and potential internal threats.

Supported a simulated client cyber security breach scenario, determining possible sources of the breach.

Evaluated internal vs external attack possibilities and assessed risk for the client.

Answered scenario-based questions demonstrating problem-solving, critical thinking, and threat detection skills.
